As the educational landscape has shifted toward digital instruction, we’ve adapted our product to better fit your district’s distance-learning needs.

Please note that not all updates are complete and currently available. All features will be implemented during Fall 2020.

**Admin Assignment Capability**
Admins can distribute digital assignments and benchmark assessments across all grades at the school or district level.

**Support for Hands-On Learning at Home**
These new videos were designed to help teachers and students engage in hands-on learning in the virtual environment. More topics and concepts will be added throughout the fall.

**Embedded Virtual Class Sessions**
Teachers can launch live virtual class sessions from within STEMscopes using various online meeting tools.

**New Data and Gradebook Integrations**
We’ve teamed up with new partners—including Aeires, Infinite Campus, Schoology, and Skyward—to help teachers easily set up classes and manage grades.

**Enhanced Grading and Feedback**
Since more work is now completed online, we made several improvements to ensure an intuitive, efficient process for grading and feedback provision.

**More Assignable Videos**
Teachers can digitally assign even more videos in our STEMscopes Streaming package!

**Virtual Attendance**
Teachers and districts can track student attendance for synchronous and/or asynchronous instruction.

**Autosave Student Work**
While working on an assignment, student responses will automatically save every 30 seconds to avoid lost work.

**Professional Support for Virtual Instruction**
The STEMscopes Professional Development Team and the National Institute for STEM Education have created a new suite of online STEM certifications and live virtual PD sessions to support teachers with online instruction.

**STEMscopes Coding**
Keep students engaged in remote learning with STEMscopes Coding, which shows students how to build and share their own personalized apps using typed JavaScript code.

**Upgraded Videos and Visual Glossary**
We’ve upgraded the content featured in our Content Connections and Visual Glossary for an enhanced virtual learning experience.

These updates apply to the following STEMscopes editions: Alabama, Florida, Georgia, Mississippi, North Carolina, Tennessee, and Virginia.
