

STEMscopes™
THE LEADER IN STEM EDUCATION

PROFESSIONAL Development for a Summer Full of ENRICHMENT & INTERVENTION

You're looking for high-quality programs, tutoring, and professional learning opportunities for teachers and students, and the STEMscopes team is here to help!

We provide professional learning services that focus on evidence-based, instructional strategies that strengthen student learning, while simultaneously nurturing the attitudes and skills fundamental to implementing a successful summer program.

WE'LL FOLLOW THESE SIMPLE STEPS TO CUSTOMIZE A SUMMER PROGRAM FOR YOUR SCHOOL OR DISTRICT:

- + We will schedule a consulting session to identify your objectives, the number of days and hours of your summer school program, and the student grade levels you will serve.
- + Our team will use your information to create a targeted roadmap, including a pre- and post-assessment to measure growth.
- + Your summer teachers will engage in professional learning to help them fully understand the STEMscopes platform and navigate the roadmap we've designed for you.
- + Upon completing the summer program, you will meet with our team to analyze post-assessment results and evaluate growth.
